

# THANKYOU!

## DEAR PARENTS, TEACHERS, AND PEAKERS,

Last week was our last full day of PEAK. Student teams had much to do and accomplish in that single day of work. They completed missing research on their island focus areas. They also finished their PowerPoint slides where the images they selected helped to better tell their story. Teams also recorded their narration into PowerPoint. Many teams completed the recording and were able to export their presentation to video. I have shared with families the video projects via email. Hopefully, they have been easy to open and view!

Not all teams are finished, however. Many are very close and need a bit more time next week to get to the end. Students have done so well on this project, and I think their presentations are strong!

Next week is the last time PEAK students will attend for the school year. Teams that have not yet completed their presentation will focus on that and get their project ready for video export and sharing. Also, students will spend some time reflecting on their last unit of study, as well as their PEAK year. They will provide me with their thoughts and feedback through the end-of-unit and end-of-year surveys. We will also have some much-deserved downtime to celebrate a successful year and even have an opportunity to say goodbye, at least for the summer. I will bring some treats and we'll have a bit of an end of PEAK party!

I want to say Thank You to the students for making this PEAK year a great one! I've enjoyed my time with them and look forward to maybe seeing some in the summer and down the road! I also want to say Thank You to all the parents for your engagement, participation, and support of me and the PEAK program. PEAK is about learning and growing and it happens all the time, not just one day a week. Your involvement in your child's education is so valuable and appreciate your time, effort, and commitment!

**Note:** Next week PEAK has a modified schedule due to my being out of town with middle school PEAK students on Wednesday and Thursday. We will have a ½ day on either Monday or Tuesday (please see the calendar for details).

## THIS WEEK'S ACTIVITIES: (MAY 20 - MAY 21)

<b>Technology: Software</b> – I can effectively use various software applications to create content for an activity or project with teacher guidance.	<b>Our Island Presentation!</b> - Students teams will complete their PowerPoint presentation and record their island stories onto the slides they created. Their final project will be exported as a video and emailed to families!
<b>Communication: Feedback</b> - I can provide valuable feedback that thoughtfully shares my viewpoint on a topic or unit of study.	<b>How was it?</b> – Students will provide me with valuable feedback for the Island Exploration unit of study they just completed, as well as a survey allowing them to comment on their entire PEAK year!
<b>Interpersonal: Social</b> – I can have laugh and have fun with friends at a social gathering!	<b>What a Great Year!</b> – Students will enjoy their last day together with a small PEAK party!

## THANK YOU!
