

Happy Monday! 2-24-2020

- Bell Ringer: What are the 6 stages of our sun's life?
- Today's Agenda:
 - Bell Ringer
 - Life of our sun diagram
- Learning Objective: I can model the life cycle of our star, explain nuclear fusion in the core and describe the energy transfer mechanisms within the sun that move energy to Earth.

Bell Ringer Answer

- The 6 stages of the sun's life are stellar nebula, protostar, main sequence star, red giant, planetary nebula and white dwarf.

Life of Our Sun

- Read the direction on the back side of you diagram.
- You are drawing the life cycle of the sun using page 710 in the dark book as a reference picture.
- Make sure you have completed each part of the checklist.
- You may also use your sun diagram and nuclear fusion notes that are in your file folder in the back of the room.
