

### Industrial Technology Fees

Due to the cost of materials for Industrial Technology class, I ask that each child bring \$20.00. This will help with the expenses that we encounter with our projects. If you cannot afford to pay the \$20.00 that is alright, but with everyone's help it will make a more successful semester. \$8.00 – for CO<sub>2</sub> Cars - \$15.00 – for wood projects – \$6.00 for the plant stand.

## Industrial Technology Safety

In Industrial Technology **SAFETY** is of the utmost importance. **ALL** students will be required to complete a safety course and pass an assessment with a grade of 100% before working with any tools. All students will be expected to wear appropriate dress for shop work. Loose or baggy clothing will not be permitted as it may get caught in the machines, possibly resulting in injury. Open toed shoes will not be allowed in the wood shop area. Jewelry may not be worn around power equipment. Long hair must be pulled back and long sleeves must be rolled up to avoid possible injury. Safety glasses will be worn at all times during shop activities. With your help we can keep our shop injury free!

### Safety Pledge

I pledge to obey all safety rules and regulations concerning the tools, materials, and equipment in the Industrial Technology labs. I will not place myself or others in danger with my actions or behavior (rough housing). I will not operate any tools or equipment or use any material without prior instruction and approval from the instructor. I **MUST** also score a 100% on all the safety tests before operating any of the equipment/tools. Failure to comply with this is grounds for temporary or permanent removal from the class and/or other appropriate disciplinary or legal action.

---

### SYLLABUS ACKNOWLEDGEMENT

I acknowledge that I have read and understand Mr. Lyndes syllabus for the 2021-2022 school year.
